## CENTRAL STATSTICAL AGENCY

 PRODUCER PRICE INDICES FOR MANUFACTURING (PPI-M)July 2008 to September 2008

## PPI - Total Manufacturing

In the Third quarter of 2008, Producer Price Index for Total Manufacturing has increased by 3.7 percent in July, 1.3 percent in August and decreased by 0.2 percent in September, as shown in Table 2 and the corresponding figure (Figure 1). Compared to the previous year's same quarter, Total Producer Price Indices increased by 37.0 percent, 38.0 and 39.2 percent in July, August and September, respectively. As depicted in Table 3, this increase in producer prices of manufactured products was caused mainly by the rise in producer prices of food products as the same as the previous quarter. As compared to previous year's same quarter, Producer Price Index increased by 38.0 percent in the Third quarter of 2008 (Table 4).

Figure 1: Monthly Producer Price Indices for all items (compared to the previous month)

Figure 2: Monthly Producer Price Indices for all items

## PPI - Food, Beverage and Tobacco

The producer price indices of food, beverage and tobacco stood at 198.8, 203.4 and 201.1 in July, August and September as depicted in Table 1. Compared to the previous month the index increased at a rate of 3.7 percent in July, 2.3 percent in August and decrease by 1.1 percent in September, respectively (Table 2). As shown in Table 3, compared to the same quarter in 2007, producer price indices exhibited a hike of around 43.3 percent in July, 46.2 percent in August and 48.8 percent in September, respectively. This was mainly attributed to the rise in Grain Mill products and Beer and malt products. The percentage change in producer price indices revealed that there was a 46.1 percent rise in prices of food, beverage and tobacco products in this quarter compared to the previous year's same quarter as shown in Table 4.

## PPI - Other than Food, Beverage and Tobacco

 The monthly producer price indices for manufacturing products other than food, beverage and tobacco products stood at 164.5, 165.2 and 166.2 in July, August and September, respectively as shown in Table 1. Table 2 shows that, producer price indices increased by 3.8 percent in July, followed by a 0.4 percent in August, and a 0.6 percent increase in September. On the other hand, compared to previous year's same period, producer price indices exhibited a 32.2 percent, 31.9 percent and 32.3 percent rise in July, August and September, respectively (Refer to Table 3). This rise was mainly due to the increase in prices of fabricated metal products except machinery \& equipment and basic iron and steel. The percentage change in producer price indices between the corresponding quarters also indicated that there was a 32.1 percent increase in prices of products other than food, beverage and tobacco products as shown in Table 4.
