

FOREWORD

Statistical data that reflect the socio-economic and demographic conditions of the residents of a country are useful for designing and preparation of development plans as well as for monitoring and evaluation of the impact of the implementation of the development plans. These statistical data include population size, age, sex, disability and orphanhood statuses, literacy and education, economic activity, marital status, migration, fertility, mortality, housing characteristics and conditions...etc. In order to fill the gap for these socio-economic and demographic data need, Ethiopia has conducted its third National Population and Housing Census in the months of May and November 2007.

The 2007 Population and Housing Census of Ethiopia was conducted under the auspices of the Population Census Commission that was established by a proclamation No. 449/1997. The Commission is chaired by the Deputy Prime Minister and the members of the commission were drawn from various relevant Ministries, Regional State Representatives, House of Federation, National Electoral Board and the Central Statistical Agency, serving as the Office of the Census Commission (Secretariat). According to this proclamation, the processing, evaluation and analyses of the data collected in this census as well as its dissemination are the major responsibilities of this office. Hence, Statistical Reports of the Census for Oromiya Region present results in five separate parts:

Part I: Population Size and Characteristics;

Part II: Educational Characteristics and Economic Activity Status;

Part III: Population Dynamics (Migration, Fertility, & Mortality conditions of the population);

Part IV: Housing Characteristics and Conditions and

Part V: Population Size of Kebeles.

Thus, the Office of the Population Census Commission is pleased to present the census report entitled “The 2007 Population and Housing Census of Ethiopia: Statistical Report for Oromiya Region; Part V: Population Size of Kebeles” for the users. Subsequently, another report which deals with detailed analysis of the result of the 2007 Population and Housing Census data is in the process of being prepared and will also be prepared and printed soon.

Before the conduct of a census enumeration, a number of preparatory activities had been carried-out. Among the major census preparatory activities was the conduct of the Population and Housing Census Cartographic Work. During this census cartographic work urban and rural

kebeles were sub-divided into enumeration areas, each having 150-200 housing units and households, respectively. About 4-6 contiguous enumeration areas were made to form one supervision area. In this exercise for each enumeration and supervision area maps have been prepared.

During the census enumeration, each enumerator was given a map of an enumeration area along with other census documents and he/she was responsible to record all persons and households in that enumeration area without omission and duplication. One supervisor was also assigned to a supervision area and was responsible for ensuring the quality of the information collected in the area of his/her jurisdiction. Unlike the previous censuses, in this census enumerators were primary school teachers while supervisors were secondary school teachers.

It is to be noted that the Population and Housing Census is a huge nation wide operation which could not be undertaken by a single organization. Thus, full cooperation and assistance of government and non-government organizations, donor agencies and the general public have been obtained for the 2007 Population and Housing Census.

The office of the Population Census Commission is therefore, very grateful to the Government of Ethiopia for its huge financial and administrative supports. The office is also grateful to the development partners particularly; the United Nations Fund for Population Activities (UNFPA) and the Department for International Development (DFID) for their generous financial, logistics and technical supports. Thanks are also due to the United Nations Development Program (UNDP), the Embassy of Japan, Italian Cooperation, United Nations Children's Emergency Fund (UNICEF), as well as the Dutch and Irish Governments for their substantial financial support.

Finally, the office would like to express its appreciation for the elementary and secondary school teachers who participated in the data collection and supervision activities; the staff members of the Central Statistical Agency for their invaluable contributions throughout the census operations and also more importantly, the general public as well as the administrators at all levels, who were critical to the success of the census enumeration.

The office hopes that the data contained in this part of the Statistical Report will be utilized by all data users for various development planning.

Samia Zekaria
Member and Secretary,
Population Census Commission

CHAPTER I

INTRODUCTION

This chapter presents an over view of the contents of the census report entitled “The 2007 Population and Housing Census of Ethiopia: Statistical Report for Oromiya Region; Part V: Population Size of Kebeles”. This part presents the major statistical data on sex and urban/rural distribution of kebele population with households and housing units in the region, that are essential to policy makers, planners, administrators, researchers and other data users in a table format. The statistical Report for the region has five parts. Other parts of the report include: Part I - Statistical Report on Population Characteristics; Part II - Statistical Report on Educational Characteristics and Economic Activity Status; Part III - Statistical Report on Population Dynamics (Migration, Fertility and Mortality); and Part IV - Statistical Report on Housing Characteristics and Conditions.

In Oromiya Region the census has covered the then existing total number of 6,889 rural and urban Kebeles which were sub-divided into 30,585 enumeration areas. The May 2007 Population and Housing Census was the third Population and Housing Census. The first Population and Housing Census was conducted in May 1984 whereas the second Population and Housing Census of Ethiopia was conducted in October, 1994. In this third Census, twenty eight of May, 2007 was used as the census day or census reference day. The census has counted people on de jure and de facto basis. The de jure population comprises all the persons who belong to a given area at a given time by virtue of usual residence, while under de facto approach people were counted as the residents of the place where they found (Shryock et al., 1976). In the census, a person is said to be a usual resident of a household and hence an area) if he/she has been residing in the household continuously for at least six months before the census day or intends to reside in the household for six months or longer. Thus, visitors are not included with the usual (de jure) population. Homeless persons were enumerated in the place where they spent the night on the enumeration day. The 2007 census counted foreign nationals who were residing in the region. On the other hand, all Ethiopians living abroad were not counted.

In this census, the questionnaires that were used to collect information were generally prepared in Amharic. However, English translation of the short questionnaires was used to collect data from the foreigners residing in Oromiya Region.

In the census two types of questionnaires were used:

- i) Short Questionnaire (Appendix II) and
- ii) Long Questionnaire (Appendix III)

Unlike the previous censuses, the contents of the short and long questionnaires were similar both for the urban and rural areas as well as for all regions. But the short and the long questionnaires differ by the number of variables they contained. That is, the short questionnaire was used to collect basic data on population characteristics such as population size, sex, age, language, ethnic group, religion, disability and orphanhood. Whereas, the long questionnaire includes information on marital status, education, economic activity, migration, fertility, mortality, as well as housing characteristics and conditions in addition to those questions contained in a short questionnaire.

The enumerators collected the data and filled-in the census questionnaire by visiting households from door to door. All members of the household were recorded on the same questionnaire if their number is eight or less. Enumerators were instructed to fill-in consecutive questionnaires if the members of the household are more than eight. The type of questionnaire administered to each household depends on whether a household was selected for a long questionnaire or not. The selection procedure was determined by using a systematic sampling procedure as follows. Three days prior to the census day all households and housing units were listed in a separate form designed for the purpose. This list was used to identify the type of questionnaire that was to be administered to the households. One out of five households was systematically selected from the list /following scientific procedures/ to be interviewed using the long questionnaire, while the others were interviewed using the short questionnaire. Residents of hotels, hostels and other collective quarters were interviewed using a long questionnaire whereas homeless persons were counted using a short questionnaire.

Accordingly, information presented in this report that refer to the sizes of population (by sex and urban/rural residence) and number of households collected from all persons/households covered in the census using the short questionnaire. On the other hand, information gathered on long questionnaire including number of housing units presented in this part were collected from sampled households. Even though information on the long questionnaire was collected from a sample of the population, statistical weights were applied to make them represent the entire population. This means that the figures presented in the statistical tables that refer to housing units and others do represent the entire portion of Oromiya Region covered in the census and not only the sampled population.

The fact that the information was collected from a sample of households and not from the entire households does not make the information less reliable. In fact this process is expected to increase the quality of the information collected by reducing the work load that would have been faced if all households were covered using the long questionnaire. In turn, the reduction of the work load improves the quality of the data through facilitating a closer supervision during field work and enabling the timely processing of the data collected.

This report contains two chapters. The first chapter is the introduction of the report. Chapter IX presents the size of kebele population, number of households and housing units of each kebele. Appendix I presents the list of tables that appear on other parts of the statistical report for the region. Copies of English version- short and long questionnaires in appendices II to III respectively are presented at the end of this report.

It is worth mentioning that due to the use of weights, slight discrepancies between various tables may sometimes be observed for some of the data collected using long questionnaire. Since the homeless population comprises very small proportion as compared to the total population of the region tables that deal with marital status exclude the number of homeless population and the discrepancies are very small. Homeless persons were enumerated using only a short questionnaire because the enumeration took place at night at the place where they were spent the night, and it was not convenient to apply long questionnaire in such situations.

General Information

The following points are worth mentioning regarding the contents of the statistical report, the supply of the compiled statistical data in print and digital copies and also concerning access to raw data:

- a) The majority of the tables containing statistical data on population characteristics, disability and orphanhood statuses, educational characteristics, economic activity status, fertility, mortality, migration and housing characteristics and conditions were aggregated at region and zone levels and only few selected tables are produced at wereda level in printed reports. These will be provided in print and digital forms.
- b) More detailed information up to wereda and town levels will be provided in digital form on CDs.
- c) Apart from these, raw data as well as further detailed cross tabulations can be obtained from the Census Commission Office up on the user's request and based on its access policy with regards to the raw data.

CHAPTER IX

This chapter presents the population size of urban and rural kebeles of Oromiya Region. Table 9.1 presents the size of population, households and housing units of urban kebeles in Oromiya Region. Similarly, Table 9.2 presents the size of population, households and housing units of rural kebeles in Oromiya Region. The population size of kebeles is also distributed by sex.

APPENDIX I: LISTS OF TABLES ON OTHER PARTS OF THE STATISTICAL REPORT

PART I

CHAPTER II POPULATION CHARACTERISTICS

- 2.1 Population by Urban-Rural Residence and Sex: 2007
- 2.2 Population of Towns by Sex: 2007
- 2.3 Population by Type of Resident, Sex, and Five Year Age Group: 2007
- 2.4 Population by Type of Resident and Sex: 2007
- 2.5 Persons, Households, and Housing Units for Conventional Household and Persons and Households for Non-Conventional Households, with Households per Housing unit for Conventional Households: 2007
- 2.6 Persons and Households by Urban-Rural Residence and Household Size, with Percent Distributions and Averages: 2007
- 2.7 Population Living in Conventional Households by Relation to Head of Household, Sex, and Five Year Age Groups: 2007
- 2.8 Population by Urban-Rural Residence, Sex, and Five Year Age Group to 95+: 2007
- 2.9 Population by Urban-Rural Residence, Sex, and Single Year of Age: 2007

CHAPTER III OTHER POPULATION CHARACTERISTICS

- 3.1 Population by Urban-Rural Residence, Sex, and Ethnic Group: 2007
- 3.2 Population by Urban-Rural Residence, Sex, and Mother Tongue: 2007
- 3.3 Population by Religion, Sex, and Five Year Groups: 2007
- 3.4 Population by Religion, and Sex: 2007
- 3.5 Persons 10 years old and older by Marital Status, Sex and Age: 2007

CHAPTER IV DISABILITY AND ORPHANHOOD STATUSES

- 4.1 Population by Sex, Disability Status, and Five Year Age Group, with Disability Rate: 2007
- 4.2 Disabled Persons by Type of Disability and Sex: 2007
- 4.3 Disabled Persons in Towns by Type of Disability and Sex: 2007

- 4.4 Disabled Persons by Reason for Disability, Type of Disability and Sex: 2007
- 4.5 Disabled Persons by Type of Disability, Sex and Age Group: 2007
- 4.6 Population by Sex, Mental Problem, and Five Year Age Group, with Rate of Mental Problem per 10,000 population: 2007
- 4.7 Children Under 18 Years of Age by Orphan hood Status, Sex, and Age: 2007
- 4.8 Children Under 18 Years of Age by Orphan hood Status and Sex: 2007
- 4.9 Children Under 18 Years of Age by Type of Residence, Orphanhood Status, Sex, and Age Group: 2007

PART II

CHAPTER V EDUCATIONAL CHARACTERISTICS

- 5.1 Population 5 Years Old and Older by Literacy, Sex and Five Year Age Group: 2007
- 5.2 Population 5 Years Old and Over by School Attendance, Sex and Single Year of Age to 30+: 2007
- 5.3 Population 5 Years Old and Older by School Attendance and Sex: 2007
- 5.4 Population 5 Years Old and Over Attending School by Level, Sex, and Single Year of Age to 30+: 2007
- 5.5 Population 5 Years Old and Over Attending School by Level and Sex: 2007
- 5.6 Population 5 Years Old and Over by Urban-Rural Residence, Sex, and Highest Grade Completed: 2007
- 5.7 Population 5 Years Old and Older by Highest Level of School Completed, Sex, and Age: 2007

CHAPTER VI ECONOMIC ACTIVITY STATUS

- 6.1 Population Aged 10 Years and above by Sex, Economic Activity Status, Age Group and Economic Activity Rates, Urban and Rural: 2007
- 6.2 Population Aged 10 Years and above by Sex, Economic Activity Urban-Rural Residence and Economic Activity Rates: 2007
- 6.3 Economically Inactive Persons 10 Years and above by Reason for Inactivity, Urban-Rural Residence, Sex, Age Group and Sex Ratio: 2007

- 6.4 Economically Active Persons Aged 10 years and above by Age Group, Sex, and Employed, Unemployed and Unemployment Rates: 2007
- 6.5 Economically Active Persons Aged 10 Years and above by Sex, Employed, Unemployed and Unemployment Rates, Urban and Rural: 2007
- 6.6 Economically Active Persons of Towns Aged 10 Years and above by Sex, Employed, Unemployed and Unemployment Rates During the Last Seven Days: 2007
- 6.7 Employed Persons Aged 10 Years above by Employment Status, Urban-Rural Residence, Sex, Age Group and Sex Ratio: 2007

PART III

CHAPTER VII POPULATION DYNAMICS (MIGRATION, FERTILITY, AND MORTALITY)

- 7.1 Population and Migrants by Sex, Urban-Rural Residence, and Five Year Age Group, with Percent Migrants: 2007
- 7.2 Migrants by Length of Residence, Urban-Rural Residence, Sex and Age: 2007
- 7.3 Migrants by Length of Residence, Sex and Age: 2007
- 7.4 Rural to Urban Migrants and Urban to Rural Migrants by Sex and Age: Sex: 2007
- 7.5 Reproductive Age of Women by Five Year Age Group, Births During the last 12 Months Prior to the Census, Age-Specific Birth Rates, and Total Fertility Rates (TFRs), by Urban-Rural Residence: 2007
- 7.6 Women 10 Years Old and Older in Zones by Five Year Age Group and Number of Children Ever Born (CEB), with Total Children Ever Born and Average Children Ever Born per Woman: 2007
- 7.7 Women 10 Years Old and Older, Children Ever Born, and Children Surviving by Five Year Age Groups, with Average Number of Children Ever Born per Woman and Proportion of Children Ever Born Deceased: 2007
- 7.8 Population in Conventional Households and Deaths During the 12 Months Prior to the Census by Sex, Zone, Urban-Rural Residence, and Age: 2007
- 7.9 Women Age 12-49 Years of Age and Deaths of Women 12-49 Years of Age During the 12 Months Prior to the Census, by Urban-Rural Residence and Age-specific Death Rates: 2007

PART IV

CHAPTER VIII HOUSING CHARACTERISTICS AND CONDITIONS

- 8.1 Housing Units of Towns by Type of Housing Units: 2007

- 8.2 Housing Units by Construction Material of Wall: 2007
- 8.3 Housing Units by Construction Material of Roof: 2007
- 8.4 Housing Units of Towns by Construction Material of Ceiling: 2007
- 8.5 Housing Units of Towns by Construction Material of Floor: 2007
- 8.6 Housing Units by Number of Rooms and Average Number of Rooms per Housing Unit: 2007
- 8.7 Housing Units by Source of Drinking Water: 2007
- 8.8 Housing Units of Towns by Source of Drinking Water: 2007
- 8.9 Housing Units of Towns by Type of Toilet Facility: 2007
- 8.10 Housing Units by Type of Toilet Facility: 2007
- 8.11 Housing Units of Towns by Number of Households and Average Number of Holds Per Housing Unit: 2007
- 8.12 Housing Units of Towns by Number of Years since Construction: 2007
- 8.13 Housing Units by Type of Tenure: 2007
- 8.14 Housing Units of Towns by Type of Kitchen: 2007
- 8.15 Housing Units by Type of Kitchen for Rural Areas: 2007
- 8.16 Housing Units by Type of Fuel for Cooking in Rural Areas: 2007
- 8.17 Housing Units of Towns by Type of Fuel for Cooking: 2007
- 8.18 Housing Units of Towns by Type of Bathing Facility: 2007
- 8.19 Housing Units of Towns by Type of Lighting: 2007
- 8.20 Housing Units of Towns by Availability of Radio, Telephone and Television: 2007
- 8.21 Housing Units of Towns by Ways of Waste Disposal: 2007
- 8.22 Housing Units by Type of Waste Disposal: 2007
- 8.23 Housing Units of Towns by Number of Persons and Average Number of Persons per Housing Unit: 2007
- 8.24 Housing Units by Whether Livestock Spend the Night in the Room Where Persons also Spend the Night in Rural Areas: 2007
