Introduction

The Consumer Price Index (CPI) measures the average change in the price paid by consumers for a fixed market basket of goods and services. It is usually based on household expenditure weights of the goods and services in the basket and their current market prices. The twelve CPI's (i.e., the CPI's of the 11 Regions and the CPI at Country Level) presented in this report are based on the results of the Household Income, Consumption and Expenditure Survey (HICES) conducted by the Central Statistical Agency in 2004/2005 from which expenditure weights are derived for major household goods and services of that period and adjusted using the December 2006 retail prices of the goods and services as a base period.

The December 2006 based CPI updates the previous CPI series (i.e. December 2000 based) and the newly selected baskets are more diversified and the weights are more accurate. It also showed various improvements and incorporates non-food index as an independent group. The new series is constructed for country as a whole and Regional States including Dire Dawa and the Addis Ababa City Administration. However, similar indices had been utilized at Addis Ababa Level since 1963 and at Country, Urban and Rural Levels since 1995/96 and in Country and Regional level since 2000.

All the twelve general indices are divided into two major groups that is food and non-food index. The non-food index has ten major groups each, namely: Beverages; Cigarettes and Tobacco; Clothing and Footwear; House Rent, Construction Materials, Water, and Fuel and Power; Furniture, Furnishing, Household Equipment and Operation; Medical Care and Health; Transport and Communication; Recreation, Entertainment and Education; Personal Care and Effects; and Miscellaneous Goods and Services. On the other hand, the Food Index has 13 sub-groups. These are: Cereals; Pulses; Bread and Other Prepared Food; Meat; Milk, Cheese and Eggs; Vegetables and

Fruits; Oil and Fats Spices; Potatoes, Other Tubers and Stems; Coffee Beans (whole) and Tea Leaves; Other Food Items; Milling Charges; and Food taken Away from Home. Furthermore, the new CPI based on December 2006 includes more detailed #Housing, Construction materials, Water and Fuel and Power; components.

For the construction of the current consumer price indices, up to date data on retail prices are collected in the purposely selected sample market places located in representative urban centers in each zone/special weredas of the country. Hence, a total of 119 market places were selected for the retail price survey. In each market place an enumerator is assigned to undertaking the data collection activities. The price data is collected from the 1st day through 15th days of European Calendar month under consideration. To calculate the monthly regional consumer price indices, geometric means of prices of the specific regions are used. The distribution of the market place of each region and items included in the basket of commodities are given on Table A on page 2.

An important factor in constructing a Consumer Price Index is to select the representative basket of goods and services. Including all consumption items into the market basket of goods and services is both cumbersome and unnecessarily costly in term of data collection and processing. Furthermore, it doesn't make sense to include an insignificant weight into an index basket which could not move the price relative up or downwards compared to the general market trend. As a result, basket of goods and services included in the regional baskets are determined by expenditure cut-off point. The total numbers of items included in the regional basket in the December 2006 based indices are given in Table A on page 2.

Country level CPI aggregates the regional group indices and the contributions of the five relatively big regions in terms of the magnitude of the expenditure account for more than 95 percent. These regions are Oromiya, Amhara, SNNP, Addis Ababa and Tigray. On the other hand, the contributions of the remaining regions to the

Country Level Consumer Price Index is about five percent.

According to the weights for food and non-food groups in Table B below, the December 2006 based CPI is about 57 percent of household expenditure spent on the food component, which declined by 3 percentage points as compared to the December 2000 based CPI. On the other hand, the expenditure on non-food components increased from 40 percent to 43 percent. This indicates that the economic situation in the country is going in the right direction as postulated by economic theory. Similarly, in this period larger regions resulted in a substantial decrease in the average weights for food, despite the increased food taken out of home. It was offset mainly by an increase in housing, construction materials, water and fuel and power, furnishing and transport and communication.

As it is indicated in Table ‘C’ below the country level overall inflation rate (annual change based on 12 months Moving Average) stood at 25.3 percent in June 2008. This rate is 9.5 percentage points higher than the corresponding annual average rate of 15.8 percent at June 2007. Similarly, the country level of food inflation rate stood at 34.9 percent and the country level Non-food inflation rate stood at 12.5 percent at June 2008. On the other hand, the 2007/08 Budget Year annual average inflation rate was 18.4 percent for the overall country level inflation, 23.6 percent for Food and 11.6 percent for the Non-Food components. The Non-Food inflation rate remained relatively stable as compared to the Food inflation in the same budget year.

The 34.9 percent Country level food inflation rate in June 2008 is 17.4 percentage points higher than that of 17.5 percent inflation rate at June 2007. This higher increase in the Food inflation rate was due to the increase in price of the Food components like Cereals, Pulses, Meat, Oils and fats (the prices of Oils and fats have been relatively stable during this month), Milk and egg, Vegetable and fruits, Spices (specially Pepper whole and chilies), Potatoes & Other Tubers and Stems, Other food Items and food taken away from home.

However, as shown in Table D, if the very high price increase observed in Cereals were kept constant to the base period of December 2006, General Overall and Food inflation rate could have been 17.1 percent and 20.6 percent, respectively in June 2008.

Table 2(a) also displays that the 2006/2007 Fiscal Year Country level **General Consumer Price Index** has increased by 17.8 percent as compared to 2005/2006 Fiscal Year. This increase was attributed to the rise in the indices of its constituent regions; namely: Addis Ababa 38.0 percent, Afar 32.0 percent, Amhara 12.4 percent, Benishangul Gumuz 10.4 percent, Dire Dawa 34.5 percent, Gambela 13.3 percent, Harari 25.4 percent, Oromia 14.3 percent, SNNP 24.1 percent, Somali 23.0 percent and Tigray 22.2 percent.

Table 2 (b) reveals that the 18.9 percent increase in the country level Food index was observed due to a rise in the indices of the regions namely: Addis Ababa (25.2 percent), Afar (19.9 percent), Amhara (17.0 percent), Benishangul-Gumuz (12.7

percent), Dire Dawa (14.9 percent), and Gambela (15.8 percent), Harari (17.0 percent), Oromia (21.3 percent), SNNP (20.7 percent), Somali (8.5 percent) and Tigray (10.2 percent).
