Introduction

The Consumer Price Index (CPI) measures the average change in the price paid by consumers for a fixed market basket of goods and services. It is usually based on household expenditure weights of the goods and services in the basket and their current market prices. The twelve CPI's (i.e., the CPI's of the 11 Regions and the CPI at Country Level) presented in this report are based on the results of the Household Income, Consumption and Expenditure Survey (HICES) conducted by the Central Statistical Agency in 2004/2005 from which expenditure weights are derived for major household goods and services of that period and adjusted using the December 2006 retail prices of the goods and services as a base period.

The December 2006 based CPI updates the previous CPI series (i.e. December 2000 based) and the newly selected baskets are more diversified and the weights are more accurate. It also showed various improvements and incorporates non-food index as an independent group. The new series is constructed for country as a whole and Regional States including Dire Dawa and the Addis Ababa City Administration. However, similar indices had been utilized at Addis Ababa Level since 1963 and at Country, Urban and Rural Levels since 1995/96 and in Country and Regional level since 2000.

All the twelve general indices are divided into two major groups that is food and non-food index. The non-food index has ten major groups each, namely: Beverages; Cigarettes and Tobacco; Clothing and Footwear; House Rent, Construction Materials, Water, and Fuel and Power; Furniture, Furnishing, Household Equipment and Operation; Medical Care and Health; Transport and Communication; Recreation, Entertainment and Education; Personal Care and Effects; and Miscellaneous Goods and Services. On the other hand, the Food Index has 13 sub-groups. These are: Cereals; Pulses; Bread and Other Prepared Food; Meat; Milk, Cheese and Eggs; Vegetables and

Fruits; Oil and Fats Spices; Potatoes, Other Tubers and Stems; Coffee Beans (whole) and Tea Leaves; Other Food Items; Milling Charges; and Food taken Away from Home. Furthermore, the new CPI based on December 2006 includes more detailed #Housing, Construction materials, Water and Fuel and Power; components.

For the construction of the current consumer price indices, up to date data on retail prices are collected in the purposely selected sample market places located in representative urban centers in each zone/special weredas of the country. Hence, a total of 119 market places were selected for the retail price survey. In each market place an enumerator is assigned to undertaking the data collection activities. The price data is collected from the 1st day through 15th days of European Calendar month under consideration. To calculate the monthly regional consumer price indices, geometric means of prices of the specific regions are used. The distribution of the market place of each region and items included in the basket of commodities are given on Table A on page 2.

An important factor in constructing a Consumer Price Index is to select the representative basket of goods and services. Including all consumption items into the market basket of goods and services is both cumbersome and unnecessarily costly in term of data collection and processing. Furthermore, it doesn't make sense to include an insignificant weight into an index basket which could not move the price relative up or downwards compared to the general market trend. As a result, basket of goods and services included in the regional baskets are determined by expenditure cut-off point. The total numbers of items included in the regional basket in the December 2006 based indices are given in Table A on page 2.

Country level CPI aggregates the regional group indices and the contributions of the five relatively big regions in terms of the magnitude of the expenditure account for more than 95 percent. These regions are Oromiya, Amhara, SNNP, Addis Ababa and Tigray. On the other hand, the contributions of the remaining regions to the

Country Level Consumer Price Index is about five percent.

According to the weights for food and non-food groups in Table B below, the December 2006 based CPI is about 57 percent of household expenditure spent on the food component, which declined by 3 percentage points as compared to the December 2000 based CPI. On the other hand, the expenditure on non-food components increased from 40 percent to 43 percent. This indicates that the economic situation in the country is going in the right direction as postulated by economic theory. Similarly, in this period larger regions resulted in a substantial decrease in the average weights for food, despite the increased food taken out of home. It was offset mainly by an increase in housing, construction materials, water and fuel and power, furnishing and transport and communication.

September 2009 Inflation Rate

As it is indicated in Table 'C' below the country level overall inflation rate (annual change based on 12 months Moving Average) stood at 18.7 percent in September 2009. This rate is 18.5 percentage points lower than the corresponding annual average rate of 37.2 percent at September 2008. Similarly, the country level food inflation rate stood at 17.5 percent and the country level Non-food inflation rate stood at 20.9 percent in September 2009. The 17.5 percent Country level food inflation rate in September 2009 is 34.3 percentage points lower than that of 51.8 percent inflation rate at September 2008. This decrease in the Food inflation rate was due to the decline in price indices of the Food components like Cereals, Pulses, Oils and Fats and Spices.

The 12 months moving average General and Food inflation showed a decline starting in March 2009 and continued the trend in September 2009. In this regard the General moving average inflation rate was 46.1 in February 2009 and consequently declined to 45.2 percent in March 2009, 44.3 in April 2009, 41.6 in May 2009, 36.4 percent in June 2009, 29.9 percent in July 2009, 24.1 percent in August 2009 and 18.7 percent in September 2009. In a similar way the Food moving average inflation rate was declined from 61.1 percent in February 2009 to 59.2 percent in March 2009, 57.2 percent in April 2009, 52.6 percent in May 2009, 44.2 in June 2009, 34.2 percent in July 2009, 25.4 percent in August 2009 and 17.5 percent in September 2009. The Moving Average Inflation rate of Non-food components has increased by 3.9 percentage points as compared to the one observed September 2009. In the recent few months, among the food components, the prices of Cereals, Bread and other prepared foods, Spices, coffee and Tea leaves and Sugar are on the rise. Among the non-food components, the prices of Fuel, Construction materials, clothing and footwear, Furniture and furnishing and Personal care and effects are increasing. However, as the numerical figures indicate the increase in prices in recent months are much lower than the situation observed last year.

Table (D) shows Inflation rate based on last year's similar month comparison. As can be seen from the table the September 2009 General year-on-year inflation has declined by 4.1 percent as compared to the one observed in September 2008. The 4.1 percent decline in General inflation rate is due to the fact that the General Consumer price Index (CPI) of 176.6 percent observed in September 2009 was less than the corresponding 184.1 percent General Consumer Price Index (CPI) observed in September 2008. The main reason for the decline in General Consumer Price Index in September 2009 is the fall in the prices of food components specially, cereals, as compared to the one observed in September 2008. Similarly, the year-on-year Food inflation declined by 13.6 percent in September 2009 as compared to the one observed in September 2008. The reason for the decline in the food Inflation rate was that the 190.5 percent Food Consumer price Index (CPI) observed in September 2009 was less than the corresponding 220.6 percent Food Consumer Price Index (CPI) observed in September 2008. However, the Non-Food inflation increased by 16.6 percent in September 2009 as compared to the one observed in September 2008.

The September 2009 Country Level Consumer Price Index has decreased by 4.0 percent as compared to September 2008 (Table 1(a)). This decline in the General Consumer Price Index is attributed to the decline in the food index by 13.6 percent. On the other hand, a rise was observed in the indices of Beverages by 6.4 percent, Cigarettes and Tobacco by 19.8 percent, Clothing and Footwear by 27.0 percent, House Rent, Construction Materials, Water and Fuel and Power by 14.1 percent, Furniture, Furnishings, Household Equipment and Operation by 18.0 percent, Medical Care and Health by 13.7 percent, Transport and Communication by 13.6 percent, Recreation, Entertainment and Education by 17.9 percent, Personal Care Effects by 26.7 percent and Miscellaneous Goods by 7.8 percent .

The 13.6 percent decline in the Food index was observed due to the fall in the indices of the components of Food index (Table 1(b)) namely: Cereals by (26.9 percent), Pulses (4.2 percent), oils and Fats (7.0 percent) and Spices by (58.0 percent). On the other hand, rises were observed in the indices of Bread and Other Prepared Food (3.3 percent), Meat (8.7 percent), Milk, Cheese and Eggs (17.9 percent), Vegetables and fruits (22.8 percent), Potatoes, Other Tubers and Stems (4.7 percent), Coffee and Tea Leaves (19.7 percent), other Food Items (26.4 percent), Milling Charge by (17.2 percent), and Food Taken Away from Home (15.2 percent) respectively.

Table (D) shows Inflation rate based on last year's similar month comparison. As can be seen from the table the September 2009 General year-on-year inflation has declined by 4.1 percent as compared to the one observed in September 2008. The 4.1 percent decline in General inflation rate is due to the fact that the General Consumer price Index (CPI) of 176.6 percent observed in September 2009 was less than the corresponding 184.1 percent General Consumer Price Index (CPI) observed in September 2008. The main reason for the decline in General Consumer Price Index in September 2009 is the fall in the prices of food components specially, cereals, as compared to the one observed in September 2008. Similarly, the year-on-year Food inflation declined by 13.6 percent in September 2009 as compared to the one observed in September 2008. The reason for the decline in the food Inflation rate was that the 190.5 percent Food Consumer price Index (CPI) observed in September 2009 was less than the corresponding 220.6 percent Food Consumer Price Index (CPI) observed in September 2008. However, the Non-Food inflation increased by 16.6 percent in September 2009 as compared to the one observed in September 2008.

Table 2(a) also displays that the September 2009 Country level General Consumer Price Index has decreased by 4.0 percent as compared to September 2008. This decrease was attributed to the decline in the indices of its constituent regions; namely: Amhara 5.9 percent, Benishangul Gumuz 8.7 percent, Gambela 11.1 percent, Oromia 5.4 percent, SNNP by 4.9 percent and Tigray 9.1 percent. On the other hand, increase in the General consumer price indices were observed for the regions of Addis Ababa 9.1 percent, Afar 5.2 percent, Dire Dawa 4.1 percent, Harari 2.3 percent and Somali 1.6 percent.

Table 2(b) reveals that the 13.6 percent decrease in the country level Food index was observed due to the fall in the indices of the regions namely: Amhara 14.4, Benishangul Gumuz 17.1 percent, Gambella 17.7 percent, Harari 5.6 percent, Oromia 14.8 percent, SNNP 15.8 percent, Somali 4.0 percent and Tigray 19.1 percent.
