Ethiopia () Urban National Informal Sector Survey 2003 (INFSEC 2003)

Overview

Type	Informal Sector Survey [hh/iss]
Identification	ETH-CSA-INFSEC-2003-V1.1
Version	Production Date: 2008-10-26 Version 1.1: Edited on December 2010

Abstract

The Central Statistical Authority (CSA) has conducted a nation wide urban informal sector survey in January 2003, to provide as part of its statistical program, comprehensive data on the size and characteristics of the informal sector and its contribution to the national economy. As a concept the Informal Sector refers to home based or individual establishment /activity operated by the owner with few or no employees. They are for the most part unregistered and operating on a very small scale and with a low level of organization. Most of them have very low level of productivity and income. They tend to have little or no access to organized markets, to credit institutions, to modern technology, to formal training and to many public services and amenities. A large number of them are carried out without fixed location or in places such as small shops, outlets or home-based activities. They are not recognized, supported or regulated by the government. They are beyond social protection, labor legislation and protective measures at the workplace. These activities comprise what has now come to be called the 'Informal Sector'. In the past the informal sector was largely ignored by official statistics. Little need was felt to collect data on its activities because development strategies were oriented towards modern medium and large-scale enterprises. The informal sector was considered a transient phenomenon that would dwindle away in the near future as more jobs were created during development.

Economic recession, adjustment policies and continued high rates of urbanization and population growth have led to an unexpected and unprecedented expansion of the informal sector in many developing countries, as modern sector enterprises, and especially the public sector, have been obliged to dismiss workers or reduce wages drastically. In some countries it is in fact only the informal sector, which absorbs the labor force and keeps the economy going, while large modern enterprises downsize. This is evidenced by the facts that in Ethiopia 50.6 percent of urban employed are in the informal sector. Consequently, in recognition of the importance of the sector to the national economy and to bridge the data gap on this sector a nation wide survey was conducted for the second time in this country. Hence the survey results could serve as an information base for macroeconomic analysis, planning, policy formulation, research, monitoring and evaluation. The data can also be used for the design, monitoring and evaluation of support policies and assistance programs for the informal sector with a view to increasing its productive potential (and, hence, its employment- and income-generating capacity), in improving the working conditions and social and legal protection of informal sector workers. Moreover, the survey result could be useful in developing an appropriate regulatory framework and promoting the organization of informal sector producers and workers, and for analysis of the situation of particular groups of informal sector workers such as women, children, and rural-urban migrants.

Kind of Data	Sample survey data [ssd]
Unit of Analysis	Enterprise

Scope & Coverage

Scope

The scope of the 2003 is to establish a clear and practical definition of the Informal Sector that is suitable to the Ethiopian condition the Central Statistical Authority has carried out the following activities. That is:

a) study the resolution of the Fifteenth International Conference of Labour Statistics, (1993), and other material on the subject including the 'Delhi Group' recommendations;

- b) study and identify the data users' demand. Well over forty institutions were invited to brainstorm on the previous questionnaire and to identify user needs.
- c) Consider the real situation existing in the country.

Based on the conduct of these activities an Informal Sector Establishment /Activity is defined as given in the concepts and definitions of this report. And those establishments/activities that fulfill the criteria given by section on the definition were covered by the survey.

Geographic Coverage

With respect to geographic area, the survey is limited only to urban centers. Hence, all the nine Regional State Capitals, Addis Ababa Administration, Dire Dawa Administrative Council, 5 big towns with a population of 100,000 and above and 74 other urban centers were selected and included. From these urban centers a total of 535 enumeration areas were covered. In these enumeration areas 15,442 households with Informal Sector operators were sampled to be covered, however, for various reasons a total of 15,035 (97.4 percent) households with Informal Sector operators were covered in the survey.

Distribution of sample units by domain (reporting levels) are:

- i) Urban Tigray
- ii) Urban Afar
- iii) Urban Amhara
- iv) Urban Oromia
- v) Urban Somali
- vi) Urban Benshangul_Gumuz
- vii) Urban SNNP
- viii) Urban Gambela

Sampling

Sampling Procedure

SAMPLE DESIGN

For the purpose of the survey, urban areas of the country were divided into two broad categories taking into account sizes of their population and anticipated distribution of establishments/activities in the Informal Sector. Category I: Nine regional capitals, Addis Ababa Administration and Dire Dawa Administrative Council, and four major urban centers of the country were grouped in this category. Each of the fifteen urban centers in this category was the survey domain (reporting level) for which separate survey results for major survey characteristics were reported. Two stage stratified sample design was used to select the sample in which the Primary Sampling Units (PSUs) were enumeration areas (EAs). Sample EAs from each domain were selected using systematic probability proportional to size; size being number of households obtained from the 1994 Population and Housing Census. Within each sample EA, 30 households with one or more operators were systematically selected from fresh list of households prepared at the beginning of the survey's fieldwork.

Category II: Urban centers in the country other than the fifteen urban centers in category I were grouped in this category. There were eight domains (reporting levels) in this category, namely,

- i) Other Urban Tigray (Excluding Mekele)

- ii) Other Urban Afar (Excluding Aysayta)
- iii) Other Urban Amhara (Excluding Gondar, Bahir Dar, Dessie)
- iv) Other Urban Oromia (Excluding Jima, Nazreth, Debre Zeit)
- v) Other Urban Somali (Excluding Jigjiga)
- vi) Other Urban Benshangul_Gumuz (Excluding Assosa)
- vii) Other Urban SNNP (Excluding Awasa)
- viii) Other Urban Gambella (Excluding Gambella)

Three-stage stratified sample design was adopted to select the sample from domains in category II. The PSUs were urban centers selected using systematic probability proportional to size; size being number of households obtained from the 1994 Population and Housing Census. The secondary sampling units were EAs which were selected using systematic probability to size, size being number of households obtained from the 1994 Population and Housing Census. Number of sample EAs selected from each of the sample urban centers was determined by proportional allocation to their household from the census. Ultimately, 30 tertiary sampling units (households with a minimum of one Informal Sector Operator as a member) from within each selected EA were systematically selected from fresh list of households prepared at the beginning of the survey's fieldwork.

All in all twenty-three domains, including total urban (country level) were defined for the survey. Definition of the survey domains was based on both technical and resource considerations. More specifically, sample size for the domains were determined to enable provision of major indicators with reasonable precision subject to the resource available for the survey.

Other than the twenty-four domains (reporting levels) defined in Category I and II eight additional domains can be constructed by combining domains from the first two categories.

These domains are:

- i) Urban Tigray
- ii) Urban Afar
- iii) Urban Amhara
- iv) Urban Oromia
- v) Urban Somali
- vi) Urban Benshangul_Gumuz
- vii) Urban SNNP
- viii) Urban Gambela

Data Collection

Data Collection Dates	single 2002
------------------------------	-------------

Data Collection Mode	Face-to-face [f2f]
-----------------------------	--------------------

Data Collection Notes

In line with the objectives and nature of the survey the investigation was carried out by personal interviews. One enumerator was assigned in a selected enumeration area and made a complete list of households and Informal Sector operators by going from house to house using the enumeration area map prepared for the 1994 Population and Housing Census and later on updated to include changes that occurred since the Census.

a) Identification of Informal Sector Operators

In order to identify the households with Informal Sector Operators, the following screening criteria were used during the listing of households within the selected enumeration area:

- i. at least one member of the household must be engaged in productive activity.
- ii. employment status of the owner of the activity must be either an employer or a self operated activity,
- iii. the establishment/activity shall not be a corporate type of enterprise,
- iv. the establishment/activity should not keep a complete book of accounts,
- v. number of persons engaged (if any) including the operator must be less than 10.
- vi. the establishment/activity should not be registered by any legal authority which gives licenses.

b. Reference Period

The reference period for most of the data items in the questionnaire is the last 12 months, preceding the survey date. However, since the Informal Sector operators (the respondents) by and large have no record keeping practices, monthly, quarterly, etc. data were collected where the operators were not able to provide annual data. In such situations, the enumerators were instructed to indicate whether the information collected was monthly, quarterly...etc in the space provided for each specific question.

Data Collector(s)	Central Statistical Agency (CSA) , Ministry of Finance and Economic Development
--------------------------	---

Data Processing & Appraisal

Data Editing

a. Editing, Coding and Verification

In order to attain the required level of quality of data, various quality control mechanisms were applied on the different stages of the survey activities. Classroom as well as practical training to the field staff was one of the mechanisms used. The other step taken to control the quality of the survey data was preparing a detail and clear editing and coding instruction manual. Using this manual, editors and verifiers were given training for three days.

Then, the filled in questionnaires were manually edited and coded. Verification was done on 100 percent basis before the questionnaires were sent to computer section for data entry.

b. Computer Data Entry, Cleaning and Tabulation

Data entry and verification were done on personal computers using the Integrated Microcomputer Processing System (IMPS) software. Using the computer edit specification prepared earlier for this purpose, the entered data were cleaned. Finally, applying IMPS software, tabulation of results and variances were processed by one programmer with assistance from the subject matter personnel.

Access Conditions

The Central Statistical Agency (CSA) is committed to achieving excellence in the provision of timely, reliable and affordable official statistics for informed decision making in order to maximize the welfare of all Ethiopians. This is achieved through the collection and analysis of censuses, surveys and the use of administrative data as well as the dissemination a range of statistical products and providing assistance and services to users.

A microdata dissemination policy is established by CSA to address the conditions and the manner in which anonymized microdata files may be released to users for research purposes. It also strives to identify the different levels of anonymization for different categories of data use. This policy is available at CSA website (<http://www.csa.gov.et>).

CSA will release microdata files for use by researchers for scientific research purposes when:

The Director General is satisfied that all reasonable steps have been taken to prevent the identification of individual respondents

The release of the data will substantially enhance the analytic value of the data that have been collected
For all but purely public files, researchers disclose the nature and objectives of their intended research,
It can be demonstrated that there are no credible alternative sources for these data, and
The researchers have signed an appropriate undertaking.

Terms and conditions of use of public data files are the following:

The data and other materials provided by CSA will not be redistributed or sold to other individuals, institutions, or organizations without the written agreement of CSA.

The data will be used for statistical and scientific research purposes only. They will be used solely for reporting of aggregated information, and not for investigation of specific individuals or organizations.

No attempt will be made to re-identify respondents, and no use will be made of the identity of any person or establishment discovered inadvertently. Any such discovery would immediately be reported to the CSA.

No attempt will be made to produce links among datasets provided by CSA, or among data from the CSA and other datasets that could identify individuals or organizations.

Any books, articles, conference papers, theses, dissertations, reports, or other publications that employ data obtained from CSA will cite the source of data in accordance with the Citation Requirement provided with each dataset.

An electronic copy of all reports and publications based on the requested data will be sent to CSA.

The original collector of the data, CSA, and the relevant funding agencies bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

Cost Recovery Policy:

It is the policy of CSA to encourage broad use of its products by making them affordable for users. Accordingly, CSA attempts to ensure that the costs of creating anonymized microdata files are built-in to the survey budget.

At the same time, CSA attempts to recover costs associated with the provisions of special services that benefit only a specific group. Information on the price of each dataset is available at CSA website (<http://www.csa.gov.et>).

Citation Requirements

The following statement must be used as citation:

"Central Statistical Agency of Ethiopia (CSA). Urban National Informal Sector Survey 2003(ISS). "

Rights & Disclaimer

Disclaimer

The user of the data acknowledges that the original collector of the data, the authorized distributor of the data, and the relevant funding agency bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

File Demographic_Characteristics	
#1 REG: REGION	
Information	[Type= continuous] [Format=numeric] [Range= 1-15] [Missing=*]
Statistics [NW/ W]	[Valid=16866 /-] [Invalid=0 /-]
Literal question	Region
#2 ZONE: ZONE	
Information	[Type= continuous] [Format=numeric] [Range= 1-13] [Missing=*]
Statistics [NW/ W]	[Valid=16866 /-] [Invalid=0 /-]
Literal question	Zone
#3 WERE: WOREDA	
Information	[Type= continuous] [Format=numeric] [Range= 1-34] [Missing=*]
Statistics [NW/ W]	[Valid=16866 /-] [Invalid=0 /-]
Literal question	Woreda
#4 TOWN: TOWN	
Information	[Type= continuous] [Format=numeric] [Range= 1-6] [Missing=*]
Statistics [NW/ W]	[Valid=16866 /-] [Invalid=0 /-]
Literal question	Town
#5 KEFT: KEFTEGNA	
Information	[Type= continuous] [Format=numeric] [Range= 1-28] [Missing=*]
Statistics [NW/ W]	[Valid=16866 /-] [Invalid=0 /-]
Literal question	Higher
#6 KEBL: KEBELE	
Information	[Type= continuous] [Format=numeric] [Range= 1-57] [Missing=*]
Statistics [NW/ W]	[Valid=16866 /-] [Invalid=0 /-]
Literal question	Kebele/Locality
#7 EA: ENUMERATION AREA	
Information	[Type= continuous] [Format=numeric] [Range= 1-25] [Missing=*]
Statistics [NW/ W]	[Valid=16866 /-] [Invalid=0 /-]
Literal question	Enumeration area code
#8 FAMILY: FAMILY ID	
Information	[Type= continuous] [Format=numeric] [Range= 0-993] [Missing=*]
Statistics [NW/ W]	[Valid=16864 /-] [Invalid=2 /-]
Literal question	Serial number of households
#9 OWNER: OWNER ID	
Information	[Type= continuous] [Format=numeric] [Range= 0-93] [Missing=*]
Statistics [NW/ W]	[Valid=16860 /-] [Invalid=6 /-]
Literal question	Activity/Enterprise owner's name and ID number

File Demographic_Characteristics

#10 P201: RELATION

Information [Type= continuous] [Format=numeric] [Range= 0-6] [Missing=*9]

Statistics [NW/ W] [Valid=16866 / 799352.78] [Invalid=0 / 0]

Literal question Relationship to the head of the household
use code zero (0) for head of the HH, use code one (1) for spouse use code two (2) for son/daughter, use code three (3) for mother/father, use code four (4) for sister/brother, use code five (5) for other relative and use code six (6) for non-relative

Value	Label	Cases	Weighted	Percentage (Weighted)
0	HEAD OF HH	10801	512875.8	64.2%
1	WIFE	3817	179385.8	22.4%
2	CHILDREN	1518	77609.3	9.7%
3	FATHER/MOTHER	42	1512.2	0.2%
4	BROTHER/SISTER	265	11682.3	1.5%
5	RELATIVE	284	11009.7	1.4%
6	NO RELATION	139	5277.8	0.7%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#11 P202: SEX

Information [Type= continuous] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=16866 / 799352.78] [Invalid=0 / 0]

Literal question Sex use code one (1) for male and use code two (2) for female

Value	Label	Cases	Weighted	Percentage (Weighted)
1	MALE	6601	328808.3	41.1%
2	FEMALE	10265	470544.5	58.9%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#12 P203: AGE

Information [Type= continuous] [Format=numeric] [Range= 7-97] [Missing=*]

Statistics [NW/ W] [Valid=16842 / 798271.64] [Invalid=24 / 1081.14] [Mean=36.53 / 36.511] [StdDev=13.574 / 13.788]

Literal question Age /in full years/ _____

#13 P204: RELIGION

Information [Type= continuous] [Format=numeric] [Range= 1-6] [Missing=*9]

Statistics [NW/ W] [Valid=16862 / 799257.18] [Invalid=4 / 95.6]

Literal question What is your Religion?
use code one (1) for Orthodox use code two (2) for Protestant, use code three (3) for Catholic, use code four (4) for Muslim, use code five (5) for Traditional and use code six (6) for Other /specify/

Value	Label	Cases	Weighted	Percentage (Weighted)
1	ORTHODOX	10651	551579.8	69.0%
2	PROTESTANT	1563	72683.6	9.1%
3	CHATOLIC	144	8927.6	1.1%
4	MUSILUM	4431	163353.4	20.4%
5	TRADITIONAL REG	11	490.9	0.1%
6	OTHER	62	2222.0	0.3%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#14 P205: NATIONALITY

Information [Type= continuous] [Format=numeric] [Range= 1-93] [Missing=*99]

File Demographic_Characteristics

#14 P205: NATIONALITY

Statistics [NW/ W] [Valid=16858 / 799139.56] [Invalid=8 / 213.22] [Mean=33.405 / 34.147] [StdDev=29.134 / 29.017]

Literal question What is your Ethnic Group?

#15 P2061: MALE FAMILY MEMBERS

Information [Type= continuous] [Format=numeric] [Range= 0-14] [Missing=*]

Statistics [NW/ W] [Valid=15415 / 731217.29] [Invalid=1451 / 68135.49] [Mean=2.307 / 2.362] [StdDev=1.484 / 1.478]

Literal question Size of the Household (How many members do you have in your HH?) Male _____

#16 P2062: FEMALE FAMILY MEMBERS

Information [Type= continuous] [Format=numeric] [Range= 0-94] [Missing=*]

Statistics [NW/ W] [Valid=15958 / 765831.77] [Invalid=908 / 33521.01] [Mean=2.505 / 2.55] [StdDev=1.617 / 1.479]

Literal question Size of the Household (How many members do you have in your HH?) Female _____

#17 P206T: TOTAL FAMILY MEMBERS

Information [Type= continuous] [Format=numeric] [Missing=*]

Statistics [NW/ W] [Valid=0 / 0] [Invalid=16866 / 799352.78]

Literal question Size of the Household (How many members do you have in your HH?) Total _____

#18 P207: NO_YEARS_STAYED

Information [Type= continuous] [Format=numeric] [Range= 0-98] [Missing=*]

Statistics [NW/ W] [Valid=16801 / 793466.27] [Invalid=65 / 5886.51] [Mean=34.791 / 36.177] [StdDev=35.742 / 36.877]

Literal question How long have you continuously lived in this town,?
Since birth = 98
Other /specify/ _____

#19 P208: MARITAL_STATUS

Information [Type= continuous] [Format=numeric] [Range= 1-5] [Missing=*9]

Statistics [NW/ W] [Valid=16859 / 799088.8] [Invalid=7 / 263.98]

Pre-question For those aged 10 years and above

Literal question Marital status /for those aged 10 years and above/
Use code one (1) for never married use code two (2) for married, use code three (3) for divorced, use code four (4) for widowed, and use code five (5) for separated

Value	Label	Cases	Weighted	Percentage (Weighted)
1	SINGLE	3059	133095.4	16.7%
2	MARRIED	8636	431315.1	54.0%
3	WIDOWED/FEMALE	2368	118623.7	14.8%
4	WIDOWED/MALE	2448	99903.9	12.5%
5	OTHER	348	16150.8	2.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#20 P209: READ_WRITE

Information [Type= continuous] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=16866 / 799352.78] [Invalid=0 / 0]

Literal question Can you read and write? Use code one (1) for yes and use code two (2) for no

Value	Label	Cases	Weighted	Percentage (Weighted)
1	YES	8345	375286.4	46.9%

File Demographic_Characteristics

#20 P209: READ_WRITE

Value	Label	Cases	Weighted	Percentage (Weighted)
2	NO	8521	424066.4	53.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#21 P210: CLASS COMPLETED

Information	[Type= continuous] [Format=numeric] [Range= 0-97] [Missing=*]
Statistics [NW/ W]	[Valid=8350 / 375371.08] [Invalid=8516 / 423981.7] [Mean=11.11 / 12.21] [StdDev=19.187 / 21.93]
Pre-question	If the answer to the question "can you read and write?" was code one
Literal question	What was the highest grade you have complete?

#22 P211: TRAINING

Information	[Type= continuous] [Format=numeric] [Range= 1-2] [Missing=*9]
Statistics [NW/ W]	[Valid=16799 / 788902.52] [Invalid=67 / 10450.26]
Literal question	Have you had any vocational/technical training, since leaving school? Use code one (1) for yes and use code two (2) for no

Value	Label	Cases	Weighted	Percentage (Weighted)
1	YES	805	32460.4	4.1%
2	NO	15994	756442.1	95.9%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#23 P212: TYPE OF TRAINING

Information	[Type= continuous] [Format=numeric] [Range= 1-13] [Missing=*99]
Statistics [NW/ W]	[Valid=818 / 32753.53] [Invalid=16048 / 766599.25]
Pre-question	If you have received a vocational/technical training, ask this question.
Literal question	In what type of profession? Use code zero one (01) for wood/bamboo work, use code zero two (02) for electricity, use code zero three (03) for metal work, use code zero four (04) for auto /mechanical work, use code zero five (05) for other weaving and use code zero six (06) for pottery, use code zero seven (07) for masonry, use code zero eight (08) for commerce, use code zero nine (09) for carpet work, use code ten (10) for agriculture, use code eleven (11) for tailoring, use code twelve (12) for beauty works and use code thirteen (13) for other /specify/

Value	Label	Cases	Weighted	Percentage (Weighted)
1	WOOD	59	2333.7	7.1%
2	ELECTRICITY	30	1414.2	4.3%
3	METAL WORK	30	885.3	2.7%
